## REPERTORY OF FOOT-SWEAT.

OLIN M. DRAKE, M. D., BOSTON, MASS.

I have no doubt that many of my colleagues, among the true followers of Hahnemann, have often felt, like myself, the need of a complete repertory on *Foot-sweat*. The material for this repertory was culled from the *materia medicas* of Hahnemann, Allen, Hering, Lippe, Farrington, *Jahr's Manual*, *Jahr's and Possart's New Manual*; *Hull's Jahr*, *Hale*, and *Mure*; and from the periodical medical literature of our school in the English language for the past thirty years.

I have given the modalities and concomitants when I have found them in the *materia medica*—not otherwise, with a very few exceptions.

I do not believe I have omitted any Foot-sweat symptoms, but if I have overlooked any I should be glad to be informed of the fact.

I hope this short paper will be of use to some of my busy *confrères*, assisting them in finding the simillimum from the true Hahnemannian standpoint. This is my principal excuse in yielding to the wishes of several friends, who have requested me to send it to THE HOMŒOPATHIC PHYSICIAN for publication.
